Hatchery and wild age at smoltification/release

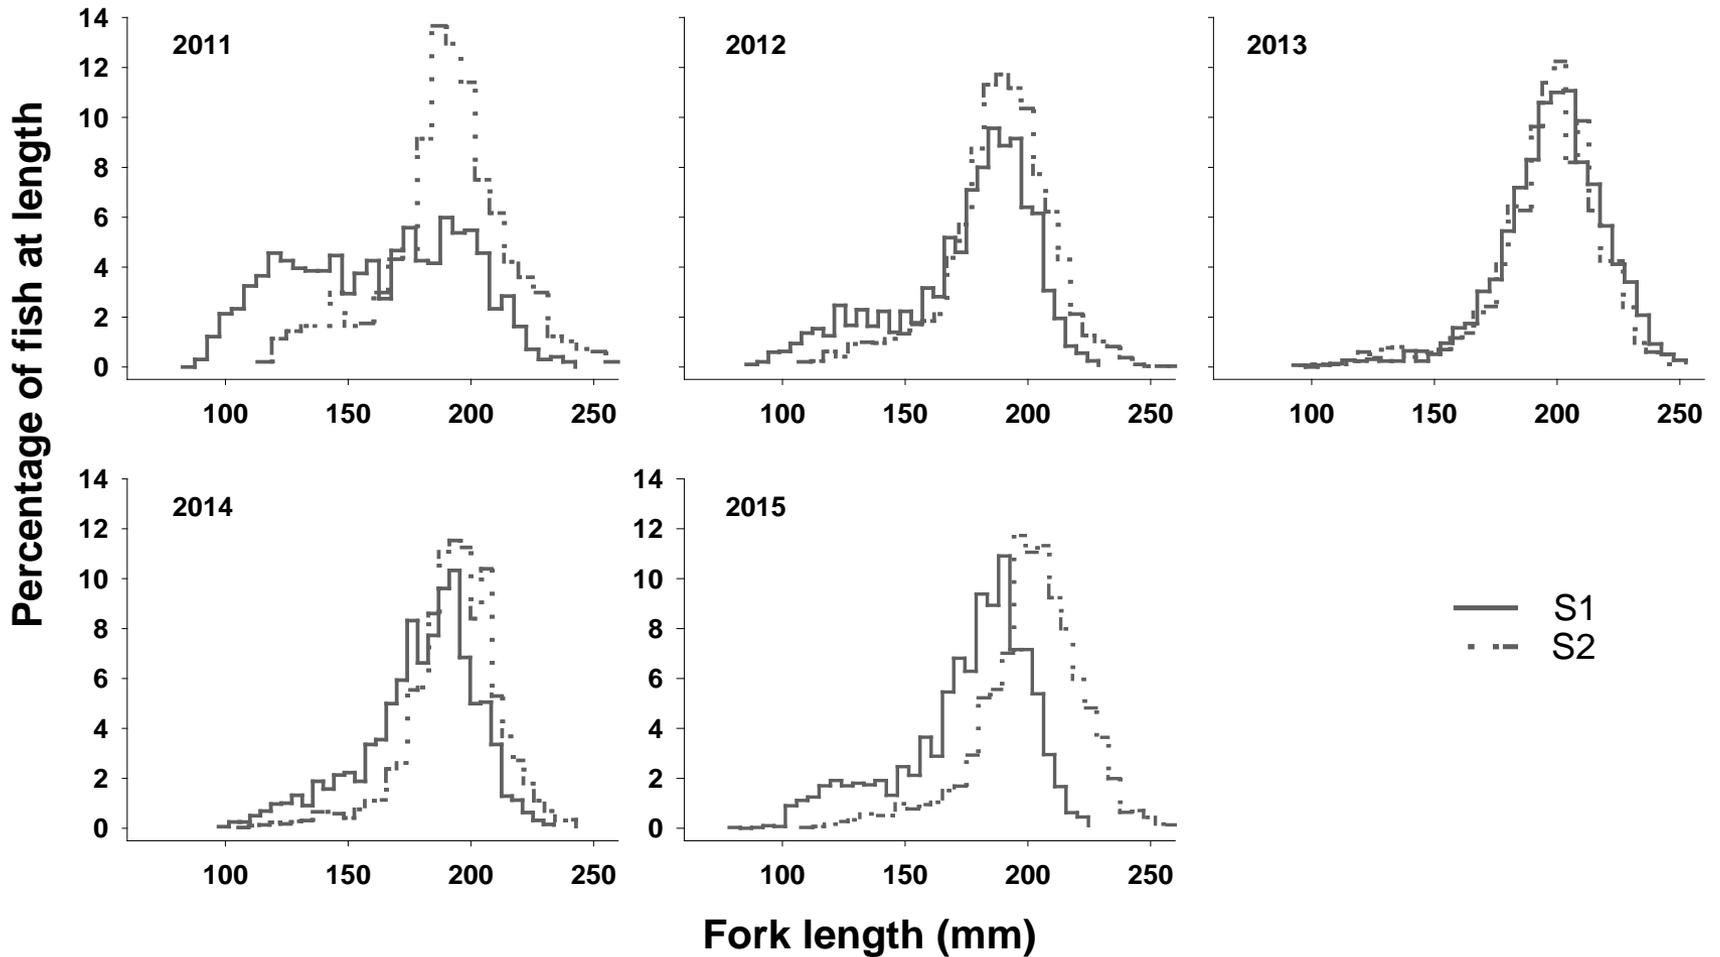

Winthrop National Fish Hatchery

Pre-release sampling of PIT-tagged steelhead

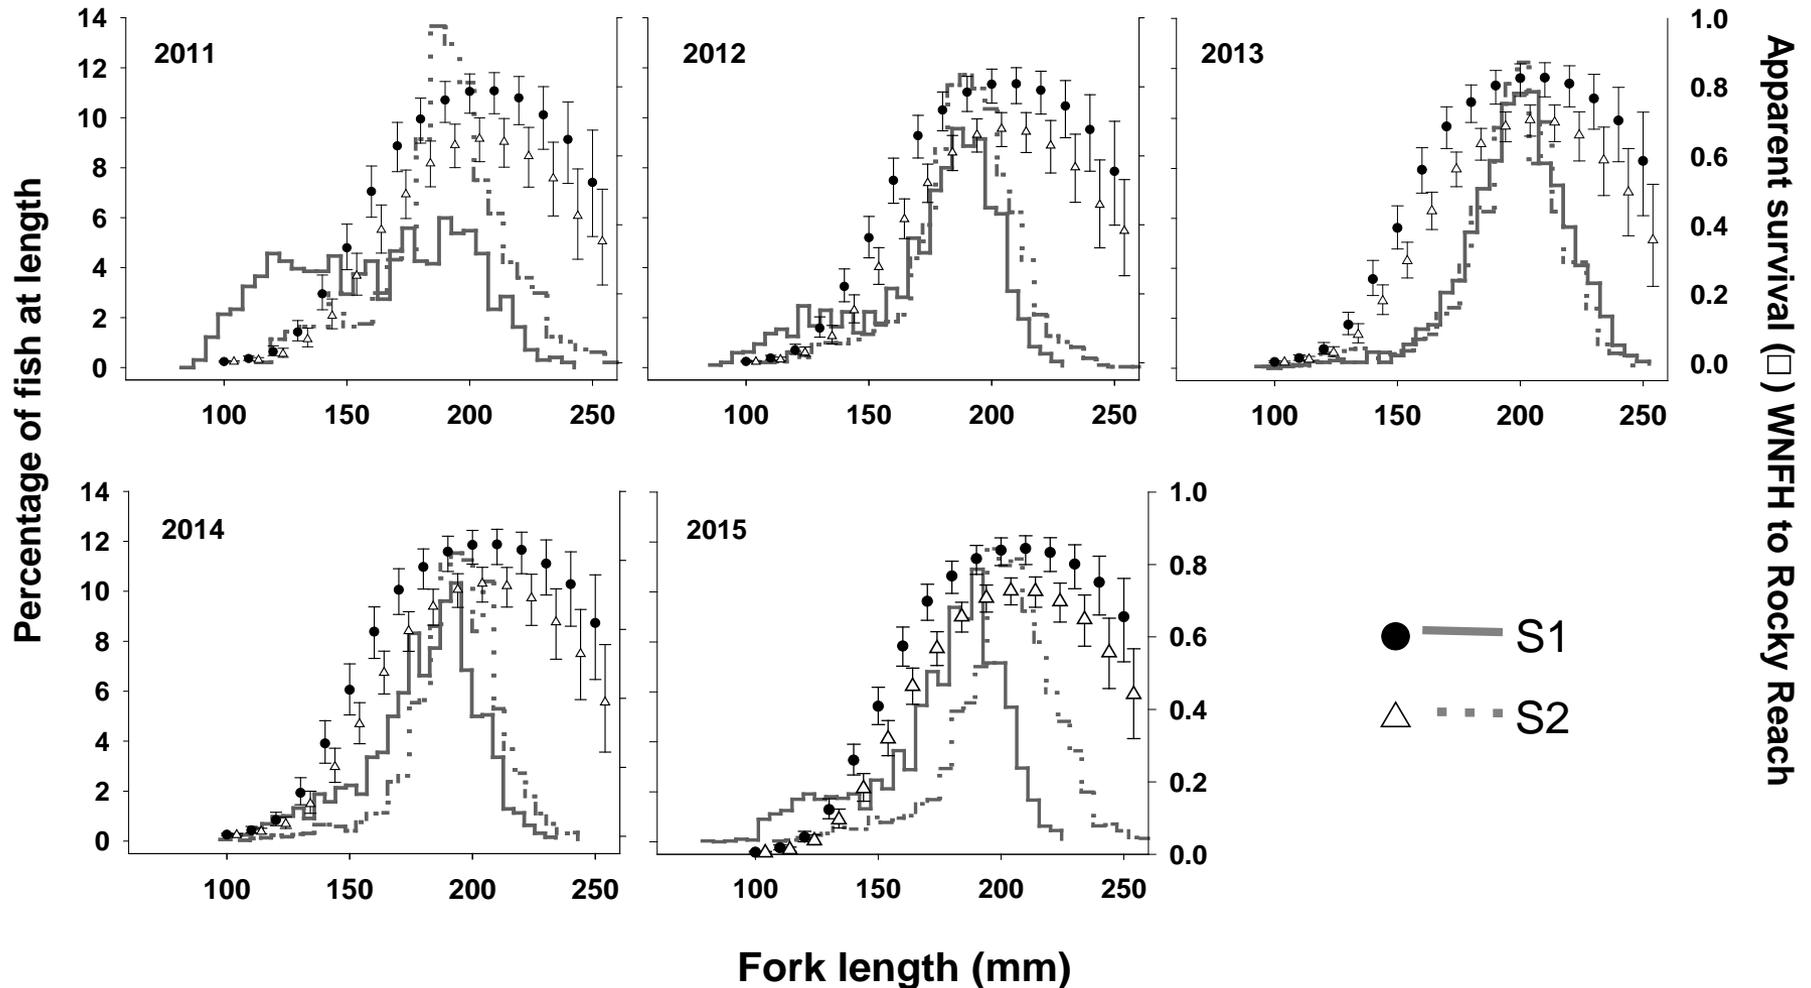

S1 and S2 size distributions by release year

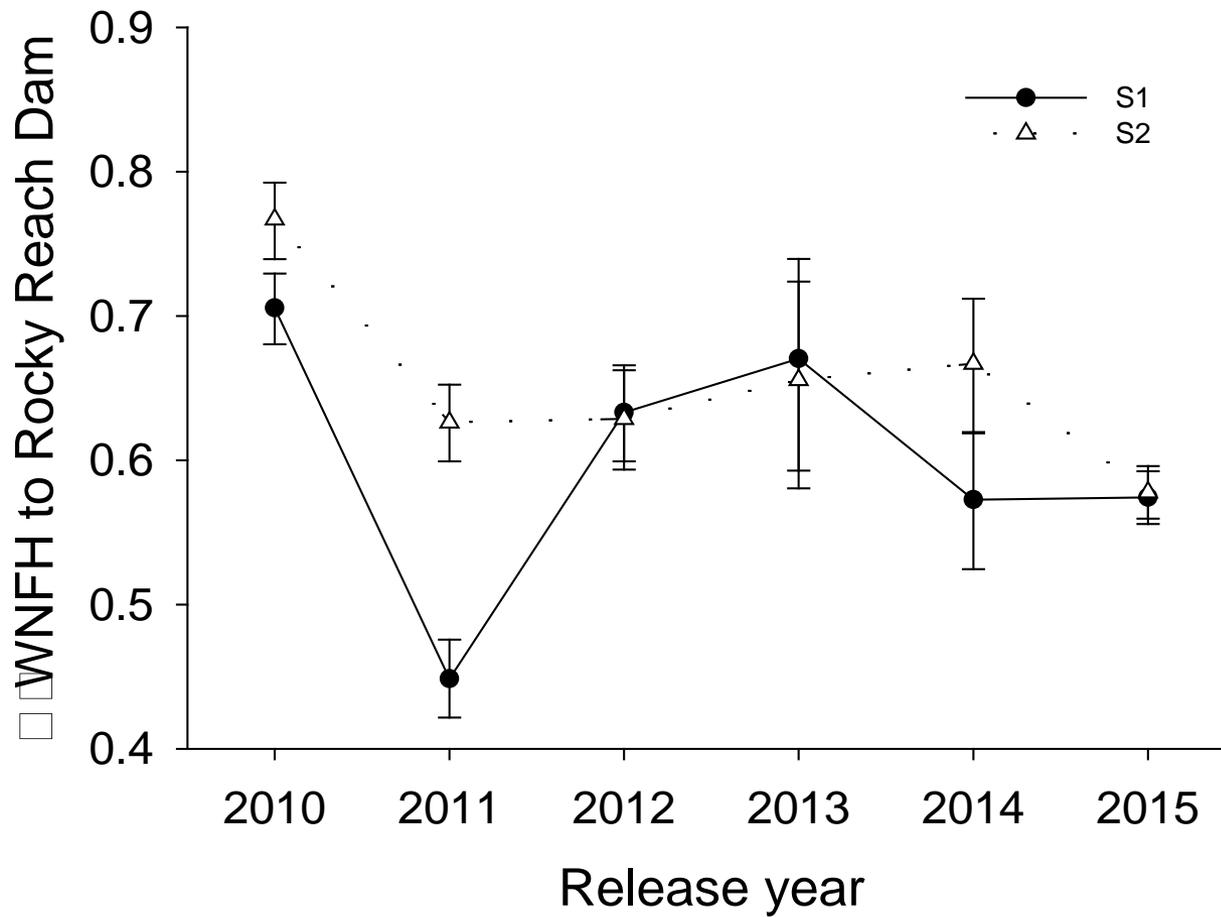

Apparent survival and fork length

$$\Phi(\text{rear} + \text{year} + \text{length} + \text{length}^2) \text{ p}(\text{rear} + \text{year} + \text{length})$$

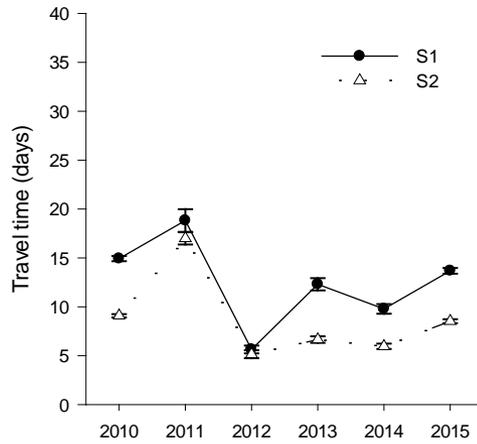

Apparent survival by rearing treatment

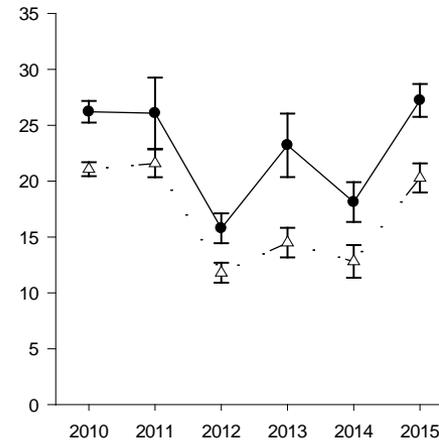

Outmigration travel rate

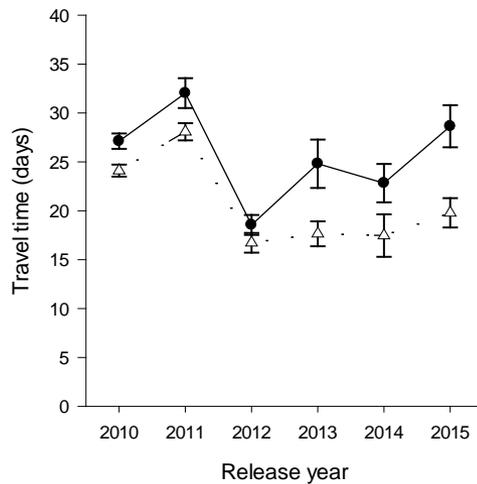

WNFH to Rocky Reach Dam

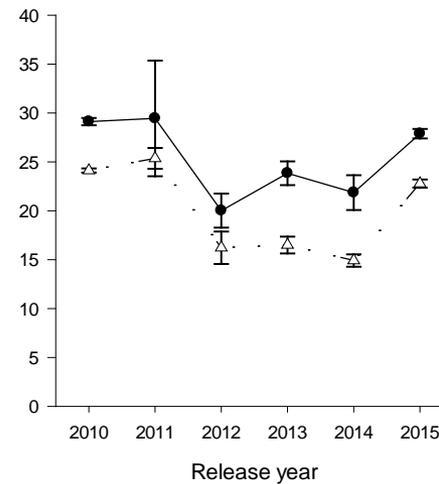

WNFH to McNary Dam

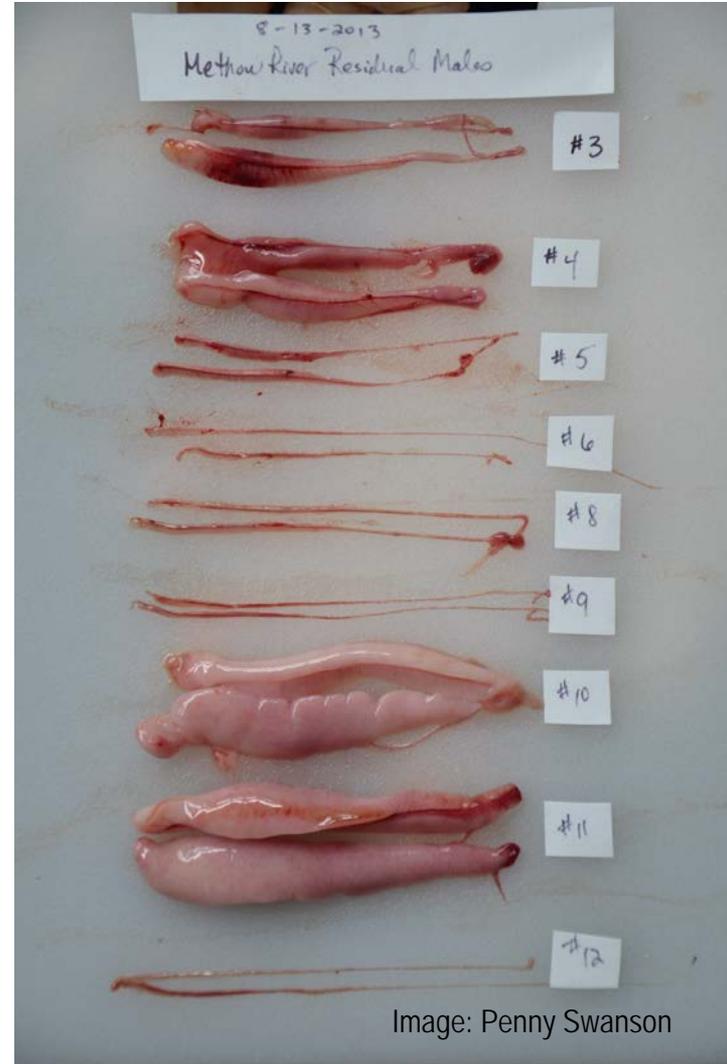

WNFH to John Day Dam

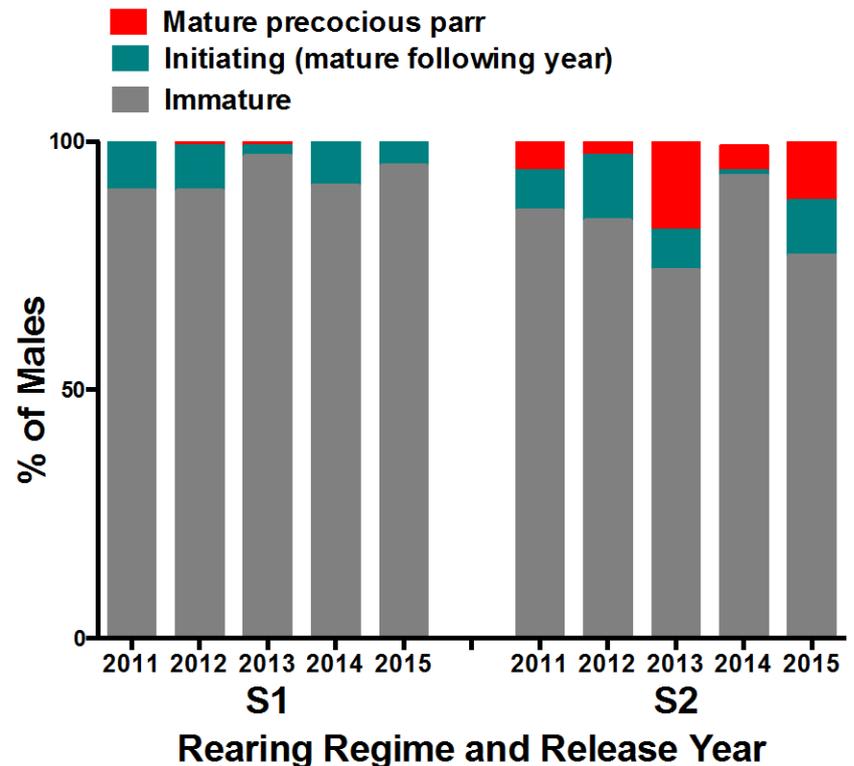

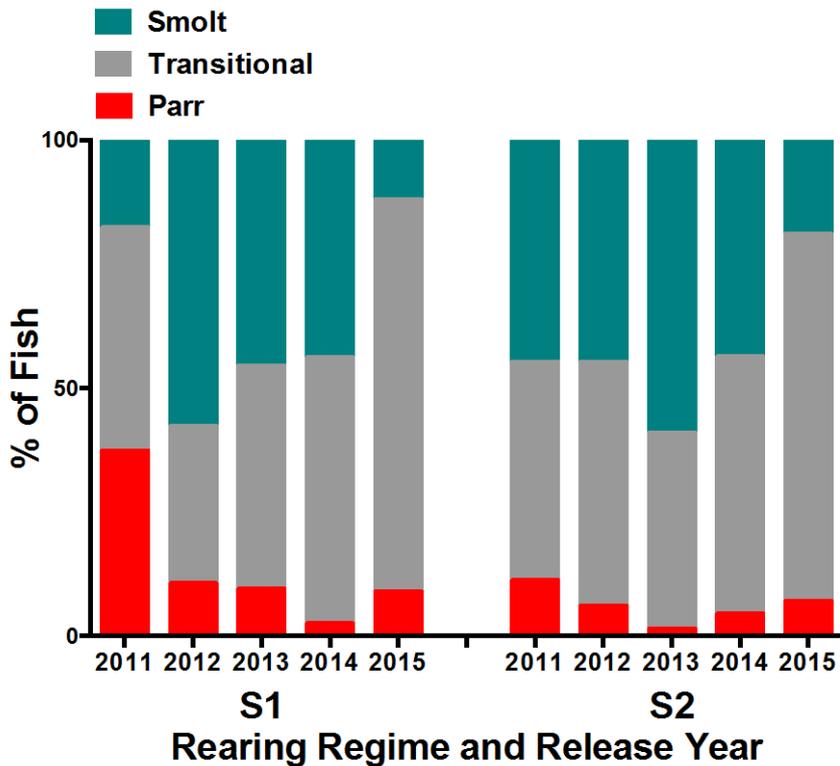

WNFH to Bonneville Dam

Precocious maturation in steelhead

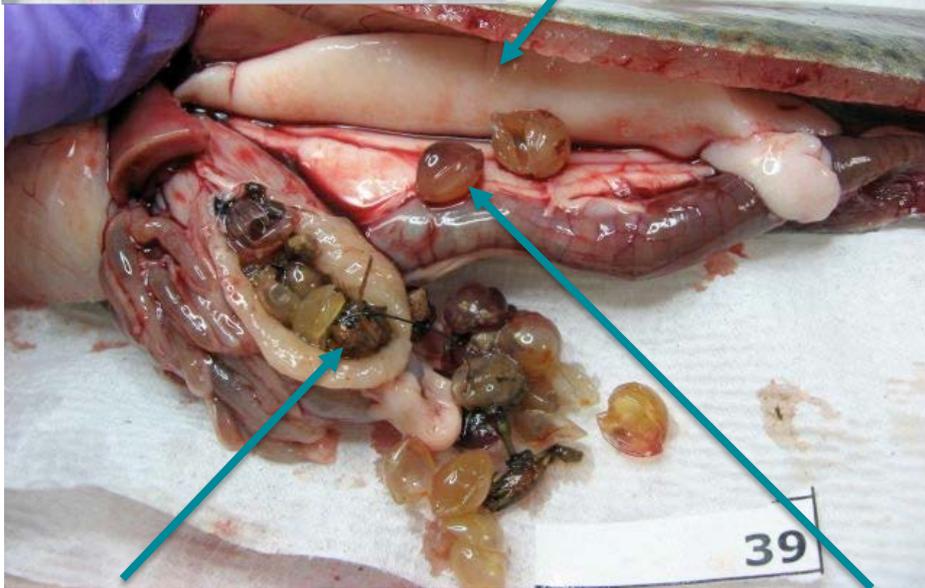

Smoltification and Precocious Maturation

Residualism and ecological interactions

Mature testes

Yellow jackets

Chinook eggs

Precocious hatchery males

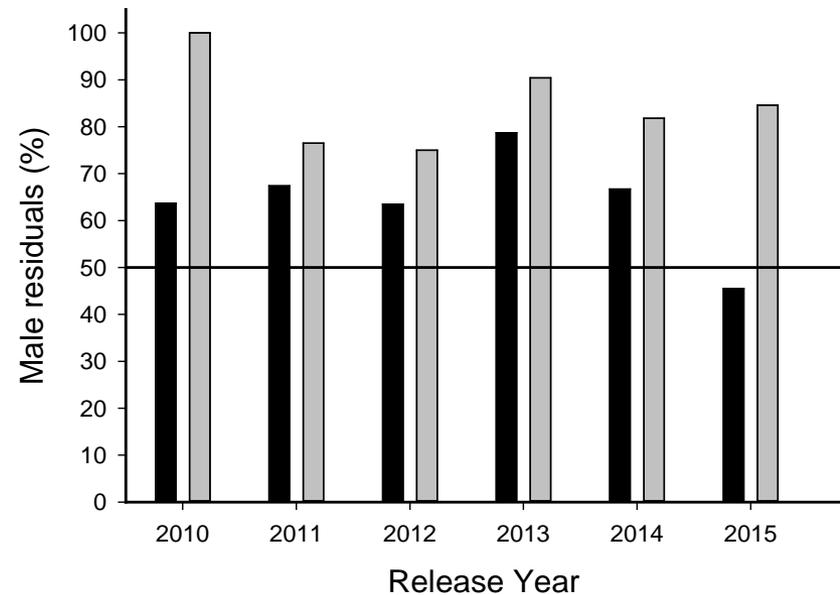

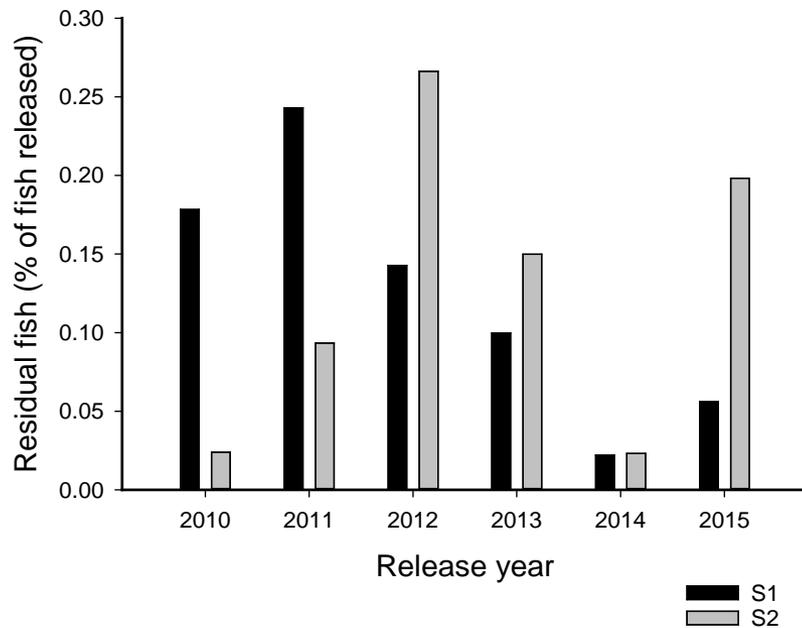

Anadromous female on redd

Residual collection

Residual index and sex ratio of residuals

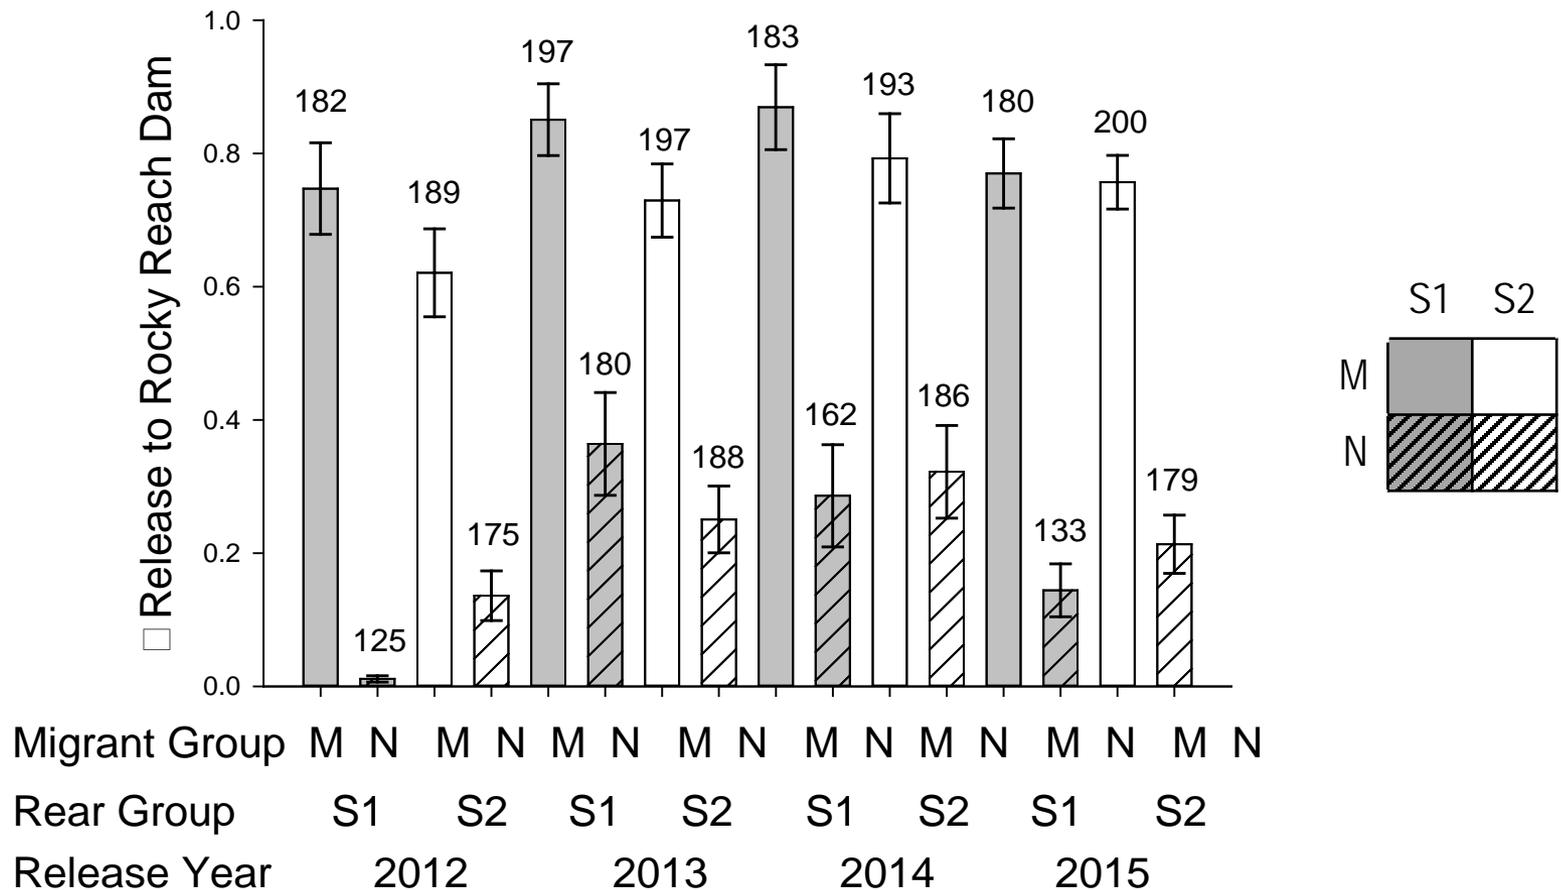

Volitional release of steelhead

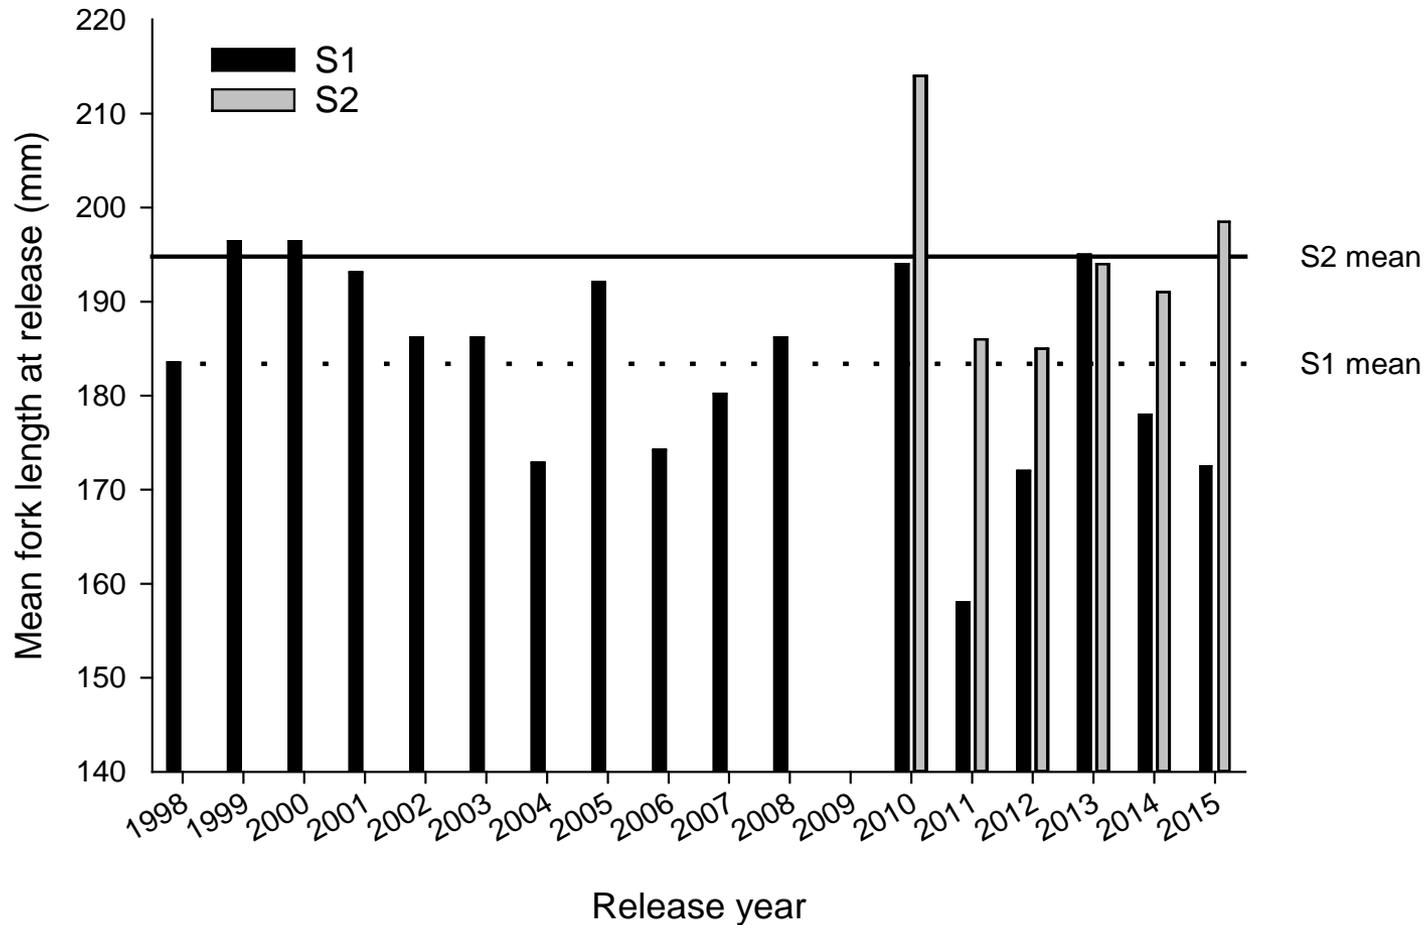

Survival of migrants and non-migrants

$$\Phi(\text{rear}+\text{mig}+\text{year}+\text{length}+\text{length}^2) \quad p(\text{rear}+\text{year}+\text{length})$$

Historic lengths at release of WNFH steelhead
